Gifted and Talented Pupil Development

Every lesson - every day, we always aim to challenge all pupils, whatever their ability! Some children have particular strengths and abilities and opportunities for Gifted and Talented pupils within the LPAP group are currently being developed by the LPAP Deputy Head Teachers.

To date these opportunities have included Maths, Languages and ICT challenges for key year groups, and in the current academic year Art, Music, ICT and Science Curriculum Days. In addition to this an e-pal group has been established whereby selected pupils are invited to take part in monthly multi curricular, deep thinking and creative tasks via the internet.

It is anticipated that further opportunities will be developed to accommodate other groups of our Gifted and talented pupils.
